Professional Summary

Software Developer with 2+ years of experience in full-stack development, building SaaS products using modern JavaScript, PostgreSQL, and cloud infrastructure. Worked closely with the Founder on product strategy, requirement gathering, stakeholder communication, and end-to-end software development in a fast-paced startup, delivering secure, production-ready solutions for 10+ Indian SMEs

Professional Experience

Software Developer <i>Sasahyog Technologies Private Limited</i>	2024 — 2026
- Built an AI-powered consultation platform integrating OpenAI API, Razorpay payment gateway, and Google Meet scheduling with automated WhatsApp notifications, acquiring 30+ unique visitors within weeks of launch. - Engineered a multi-tenant SaaS platform serving full-lifecycle HRMS (payroll, leaves, compliance, org hierarchy) and sales CRM with strict tenant data isolation using PostgreSQL row-level security and schema-per-tenant architecture. Gathered feedback from 3+ beta clients to refine features and improve UX following Agile methodologies. - Automated real-time lead ingestion from social media ad campaigns, intelligent sales agent assignment, and omni-channel outreach (WhatsApp, SMS, Email, calling) reducing manual lead routing time by 80%. - Implemented JWT Authentication with granular RBAC, immutable audit trails, and live sales performance analytics dashboards using WebSockets for real-time data streaming across client organizations. - Developed an event promotion and registration website for Rotary Club, enabling 200+ registrations, reducing manual registration effort by 90% which contributed to a sold-out event and was recognized by organizers for project excellence.	

Personal Projects

Enterprise Log Analyzer & AI Incident Triaging <i>Grafana, VictoriaMetrics, CloudWatch/Datadog APIs, Python, Gemini APIs, PagerDuty, Slack Webhooks, Docker</i>	2026
- Architected an enterprise monitoring pipeline using VictoriaMetrics & Grafana CLI/MCP, streaming real-time telemetry across multi-instance microservice architectures. - Integrated AI-driven anomaly detection with PagerDuty and exponential-backoff Slack alerts, correlating error patterns against happy-flow logs and system context. - Automated incident triage by delivering auto-generated Root Cause Analysis (RCA) reports directly into Grafana dashboards to minimize MTTR.	
Multi-Provider Omnichannel Communications Platform <i>Node.js, Redis, Kafka, PostgreSQL, WhatsApp Business API, React, Docker</i>	2026
- Built a zero-code-change, config-driven messaging platform allowing non-technical teams to schedule, batch, and broadcast campaigns across WhatsApp, SMS, and Email. - Engineered multi-sender provider integrations (MoEngage, Twilio, Meta API) featuring intelligent rate limiting, idempotency keys, and exponential retry queues. - Designed robust tenant isolation and payload validation mechanisms to eliminate message misrouting across high-volume recipient lists and background services.	

Skills

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3
Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, NestJS, Flask, Tailwind CSS, Pandas, Jest
Databases: MongoDB, PostgreSQL, Redis, Kafka
Cloud & DevOps: AWS (S3, CloudWatch), Docker, Vercel, Railway, CI/CD, Git/GitHub
Monitoring & Observability: Grafana, VictoriaMetrics, PagerDuty, Slack Webhooks
AI/ML: Generative AI (OpenAI, Gemini, Groq), Scikit-learn, Prompt Engineering
Core CS: Data Structures & Algorithms, OOP, REST APIs, WebSockets, System Design, Agile/Scrum

Research Publication

Sentiment Analysis for Amazon Product Reviews <i>International Journal of Recent Technology and Engineering (IJRTE)</i> , ISSN: 2277-3878, Vol. 11, Issue 2 DOI: 10.35940/ijrte.B7099.0711222	July 2022
